

HOPEWELL ENCLOSURES

Overview

The Cygnet Fabrications removable lid enclosure has now been in circulation for over 8 years and has undoubtedly become the no 1 choice of wellhead enclosures for landfill UK wide.

The efficient design of weatherproof hinged and lockable hatched wellhead enclosures with the full lid removal option offers operators and technicians a choice of access to suit work or sampling requirements.

As a supplement to the original wellhead enclosures design we now offer full chambers with sealed base plates and integrated through pipework to give weather and waterproof access to control valves and flow monitoring ports, thus enhancing operational life to these assets
